

CHILD GETS SICK.
CROSS, FEVERISH
IF CONSTIPATED

"California Syrup of Figs" Can't Harm
Tender Stomach or
Bowels

A laxative today saves a sick child tomorrow. Children simply will not take the time from play to empty their bowels, which become clogged up with waste, liver gets sluggish, stomach sour. Look at the tongue, mother! If coated, or your child is listless, cross, feverish, breath bad, restless, doesn't eat heartily, full of cold or has sore throat or any other children's ailment, give a teaspoonful of "California Syrup of Figs," then don't worry, because it is perfectly harmless, and in a few hours all this constipation poison, sour bile and fermenting waste will gently move out of the bowels, and you have a well, playful child again. A thorough "inside cleansing" is oftentimes all that is necessary. It should be the first treatment given in any sickness.

Beware of counterfeit fig syrups. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Look carefully and see that it is made by the "California Fig Syrup Company."—Adv.

What's Your Hurry, Bill?

A mile from the factory—takes Bill twenty minutes—Sams does it in four on his bicycle. Sams is always on time—Bill runs half the way on a heavy bicycle and is usually late.

It pays to buy an Iver Johnson, even if it does cost a little more, because it will outlive an ordinary bicycle, ride easier, costs less for repairs and the five cast-iron hand-rubbed enamel and heavy nickel plate will always look well. Prices, \$20 to \$55.

Why don't you get a 25-cent box of "Tiz" from the drug store now and gladden your tortured feet? "Tiz" makes your feet glow with comfort; takes down swellings and draws the soreness and misery right out of feet that chafe, smart and burn. The senior girls are at work making dresses for commencement, and the rest of the girls are at work making various other summer things.

The freshman girls are planning for a luncheon for their mothers as soon as it is a little less muddy and otherwise disagreeable weather.

Three of the Winooski campfire girls hiked to East Montpelier last Saturday, carrying their lunch with them and eating it out of doors. It was the first spring hike they had had.

The senior and junior agriculture classes have been studying poultry, and the freshman and sophomore classes, fertilizers and plant growth.

The school has recently purchased a victrola, which is used in the morning exercises.

The girls of the school are to show their patriotism to their country by making clothing for the soldiers, while the boys will help by raising crops, as potatoes and beans.

Improvements about the schoolhouse are being planned, such as painting the building and grading the grounds.

Vermont Official Goes to Newark, N. J.

Miss Anna L. Davis, supervisor of school nurse work in Vermont, has resigned that position to become superintendent of juvenile court work in Newark, N. J., beginning her new duties May 1.

Miss Davis had an opportunity to go to Newark a year ago, but refused it at that time as she was deep in the work of placing the advantages of medical inspection of school children before the people of this state. Now, however, she feels that the work has been sufficiently established in the principal towns and cities in Vermont so that it can be copied in others and continued successfully.

Miss Davis came to Vermont four years ago as superintendent of the Brattleboro Mutual Aid association and was the first school nurse employed there. She is a woman of unusual capabilities for which her new position will afford increased opportunity.

Valuable Property for Sale

One of the Nicest Locations in Montpelier

As my practice is such as to prevent me giving proper attention to the care and management of this property, I have decided to dispose of the so-called Buckley farm, consisting of about 60 acres on Northfield street, opposite my residence, which is only about 10 minutes' walk from business center and railroads.

This property has a street frontage of about 1,750 feet and is divided into about 28 acres of tillage, balance woodland and pasture. There is a good double brick house and large barn in good condition. Experts have estimated over 450,000 feet of lumber on the woodlot, mostly old-growth spruce and hemlock.
